

Observing and Identifying

What is a place like in relation to the human and physical geography?

During fieldwork, map work, reading and discussion ask:

What? Where? When? Why? Who?
How?

Gathering, extracting and describing information

Gather and describe information from a range of sources, including fieldwork, maps, reports, digital media and statistics.

Making Connections

How are places and spaces connected?

Understanding the **scale** of the world

Zoom in and out.

Compare, contrast, interpret, explain
analyse

Think like a Geographer

Predicting and Speculating

Making suggestions with consideration to the **environment, sustainability** and **human impact** on the world.

Reaching Conclusions

Summarising information gathered and creating justified conclusions.
Record their findings.

Evaluating

Evaluating the reliability of information and data and reflecting on the enquiry

Observing
Asking Questions

What? Where? When? Why? Who?
How?

Think like a Geographer

Predicting

What do you think?

Gathering

What information can you gather?

Reaching Conclusions

What does this show?

Making Connections

Zoom in and out to compare places
What are the similarities and differences?

Evaluating

What do you think about this?
