# Townfield Primary School

School Website & School Spider App

How to stay in the loop using our App and Website

- Photo galleries of your child's class are updated regularly although you will not be notified of each update as the amount of notifications you would receive would numerous, particularly for those with children in more than one class – this prevents important school communications being missed or dismissed

- Your child's class page contains useful information specific to your child's class, e.g. curriculum currently being taught, how to help at home, PE & Woodland days, etc.   Your child's class teacher will communicate any important information by email/app message.

- When viewing the school website on a mobile device some images/display issues may be encountered. This can be easily resolved

- The app is the best way to keep up to date as each section will have links to useful sections

  - News – check this section to see what is going on at Townfield

  - Events – this section links to the schools calendar and is useful for checking school term dates, closing times, etc

  - Galleries – this section contains galleries directly linked to classes. We are sure you will enjoy going through the galleries and seeing what your child and their class have been up to at school

TIP: if your screen does not fully display pages you can either zoom out by pinching your screen and dragging the page smaller or click the "display text" icon at the top of the screen as below

**Please visit our School Website**

Website Information

The amount of information available at your fingertips is huge, so we thought we would share with you exactly what information our website contains and where you can find the information most important to you.   Our website can be viewed on all platforms, including tablets and mobile devices, which means you can access information, anywhere.

Your child's class page is updated regularly – please take the time to check regularly for updates.

School App – School Spider

Our school website links with our school communication system and associated app, supported by School Spider which means, communication and notifications are sent direct to your smart phone device, meaning you will never miss any school communications or updates from your child's class.   You can also find news, events (school calendar) and galleries direct via the app.

TIP: if you are not receiving notifications on your smartphone, please ensure the "allow notifications" option is selected on your device.

If you do not have our school app, you can download this by following the simple steps below.
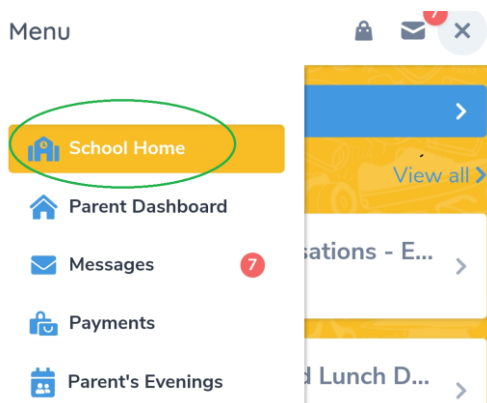

As your app fills up with school communications please ensure you scroll down the "home" section to navigate the various areas for updates.
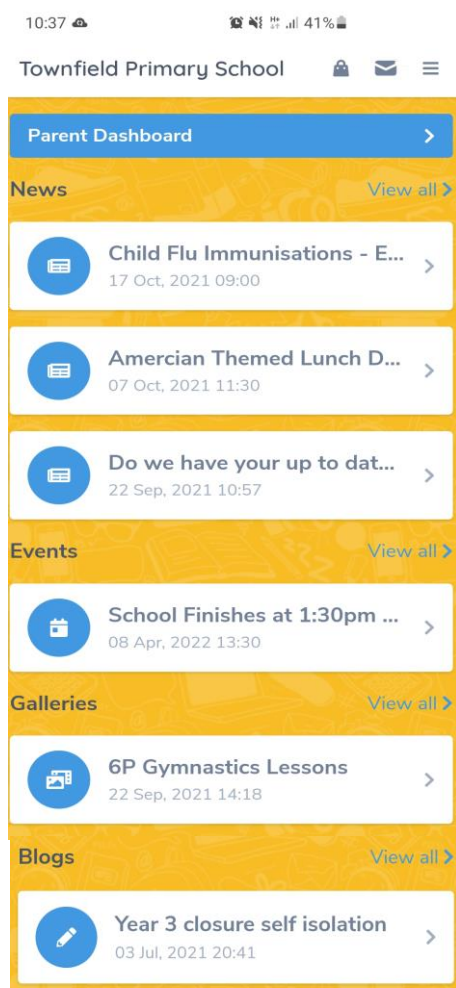

- News
- Events
- Galleries
- Blogs

If you cannot find the home area simply click the ☰ icon in the top right and corner

Then and click on 🏫 **School Home**

The following screen will appear

This will then take you to the various information areas which you can scroll through

TIP: you will only receive a log in for one parent, however both parents can download and log in with the same details.

Where parents live at separate addresses, an additional log in account can be set up. In this instance please contact the school office.
